### Wound, Ischemia, Foot Infection

#### SVS Lower Extremity Threatened Limb Classification System

##### WOUND GRADE

- 0** No rest pain.
- 1** Small, shallow ulcer.  
No exposed bone, unless limited to distal phalanx.  
No gangrene.
- 2** Deeper ulcer with exposed bone joint, or tendon, not involving the tissue heel.  
Shallow heel ulcer without calcaneal involvement.  
Gangrenous changes limited to digits.
- 3** Extensive, deep ulcer involving forefoot/midfoot.  
Deep, full thickness heel ulcer + calcaneal involvement.  
Extensive gangrene involving forefoot/midfoot.  
Full thickness heel necrosis + calcaneal involvement.

##### INFECTION GRADE

- 0** No symptoms or signs of infection.
- 1** Local infection involving only skin, SQ tissue.
- 2** Local infection with erythema >2cm, or involving structures deeper than skin, SQ (eg, abscess, osteomyelitis).
- 3** Local infection with signs of SIRs.

##### ISCHEMIA GRADE

- 0** TP > 60 mm Hg  
ABI > 0.8  
AP > 100 mm Hg
- 1** TP 40-59 mm Hg  
ABI 0.6-0.79  
AP 70-100 mm Hg
- 2** TP 30-39 mm Hg  
ABI 0.4-0.59  
AP 50-70 mm Hg
- 3** TP < 30 mm Hg  
ABI < 0.39  
AP < 30 mm Hg
